### **Poll: Most Americans Feel Threatened By the Government**

**A new survey from Pew Research Center finds more than half of Americans believe the government threatens their personal rights. The national survey marks the first time a majority of Americans have viewed the government as a threat since Pew began tracking public opinion on the subject in 1995.**

**The outgoing Homeland Security Secretary has a warning for her successor: A massive and “serious” cyber attack on the U.S. homeland is coming, and a natural disaster the likes of which the nation has never seen is also likely on its way.**

**Project Soul Catcher: Secrets of Cyber and Cybernetic Warfare Revealed reveals the cybernetic mind control by the CIA and their use of psychotronic weapons and their pursuit to weaponize neurpsychology.**

**ELECTROMAGNETIC SATELLITE TECHNOLOGY**

**THE NEUROPHONE: US Patent # 3,393,279. July 16th, 1968**

**It's a device that converts sound to electrical impulses sometimes called the "Voice of God" or makes the person think he is crazy. When the signals are sent to the brain, it makes a person think that God is speaking to him/her or even an "alien." It targets the unique bioelectrical resonance frequency using his "vibrational pattern" in the brain called a "signature" and it acts like an audio receiver.**

**THE PSYCHO - ACOUSTIC PROJECTOR:**

**U.S. patent #3,566,347, (23/2/71)**

**A device/weapon which can actually deafen the target**

**SILENT SUBLIMAL MESSAGES:**

**US Patent #5,159,703. October 27th, 1992**

**Non aural carriers in extreme audio frequency ranges are amplified or modulated with the desired material and propagated acoustically for direct inducement into the brain. This is an excellent method of influencing people without their knowledge and is used in advertising.**

**METHODS AND SYSTEMS OF ALTERING CONSCIOUSNESS:**

**US Patent # 5,123,844. June 23rd, 1992**

**US Patent # 5,289,438. February 22nd, 1994**

**These systems stimulate the brain with different frequencies and wave forms to alter the subject's state of consciousness.**

**Electro Magnetic Field (EMF)**

**Monitoring/interference is one of the most insidious and secretive of all methods used by the agencies.**

## **MICROWAVE WEAPONS:**

**&quot;A hearing system&quot; U.S. patent #4,877,027, 31/10/89 &**

**&quot;A hearing device&quot; U.S patent #4,858,612, 22/8/89**

**The first known experiment with microwaved voices was conducted by Sharp and Grove in the early 70's. However, the Defence Intelligence Agency and ARPA (The Advanced Research Projects Agency) are principally to blame for the abuse of such technologies since. eg Project Pandora etc. The CIA's Langley Research Center as well as numerous scientists working in Energy/Defence department labs across the U.S. is also responsible.□**

## **BRAIN WAVE MONITORS/ANALYSERS**

**When the brain wave pattern of an individual is detected from the use of one of numerous types of detectors such as a satellite, these brainwave signals are sent to a monitor with a computer. These brain wave patterns are interpreted through a brain wave vocabulary that records the thoughts into words. The NSA monitors the brainwaves of their targets by satellite and decodes the evoked potentials (3.50Hz 5 milliwatts) that the brain emits. So, using lasers / satellites and high- powered computers, the agencies have now gained the ability to decipher human thoughts - and from a considerable distance almost instantaneously.**

**Psychotronic Guns by Thor Jensen**

This is still an in-development project, but the potential for mayhem is unimaginable. Russia is currently working on weapons that employ electromagnetic radiation to directly affect the central nervous system—the root of all sensory processing—in a variety of unpleasant ways. The weapon will most likely build on existing research that shows the ability of low-frequency microwaves to affect brain function, alter moods and transmit false sensory data. Although this may all seem like X-Files stuff, the scientific basis is there. It's up to some unscrupulous weapons designer to put it into practice.

Sound waves have the potential to deal tremendous damage at loud enough amplitudes—think about a sonic boom, for instance. But you don't need a jet engine to turn sound into a weapon. The Long Range Acoustic Device is a creation of the American technology Corporation that was originally designed to defend safe zones around boats. It produces an incredibly loud noise that can travel almost 1000 feet in a targeted beam, and if the frequency is amplified enough it can cause legitimate physical pain in its victims.

Of all the senses you use on the battlefield, vision is probably the most important. So disrupting that can turn the tide in war. One of the most effective sensory weapons on the market right now is the Dazer Laser, made by Laser Energetics. Using a green laser source that emits both a continuous and pulsed wave, the range on the unit can be adjusted to as far as 2400 meters. One shot of the laser targeted at the eye area can completely incapacitate the victim for several minutes, long enough for them to be subdued non-lethally.

The most effective sensory weapons are ones that can engage and disorient multiple methods of input as well. Colloquially known as the “puke ray,” the Distributed Sound and Light Array Debilitator generates sound and light in a specific sequence designed to overload the brain's processors, generating feelings of unease and discomfort. Prolonged exposure can result in even more unpleasant effects, including nausea and vomiting. Some scientists are even working towards producing a portable version the size of a flashlight that can be used on an individual basis.

The sensory organ with the largest active area in the body is, of course, the sense of touch. The human body has millions of individual nerves that are used to transmit sensory data to the brain, and a new experimental weapon from the U.S. government aims to really get them going. Pulsed energy projectiles are a specially - modulated laser that generates a burst of expanding plasma when they hit a solid object. That plasma in turn emits an electromagnetic pulse that causes immediate, searing pain to nerve cells

all over the target's body. They're not in use yet, but research has been very promising.

One of the most interesting sensory weapons on the market uses audio to disorient and confuse targets, but it skips the ear entirely. MEDUSA, a product of the Sierra Nevada Corporation, doesn't create sound in a conventional way. Instead, it uses pulses of microwave radiation to generate shockwaves inside the skull that are detected by the ears from within—so earplugs won't help you at all. It can generate painful white noise and even recognizable speech that sounds like it's coming from the inside of your brain. Scary stuff

**"The Mind Has No Firewall"; Army article on psychotronic weapons (Parameters)**

The human body, much like a computer, contains myriad data processors. They include, but are not limited to, the chemical-electrical activity of the brain, heart, and peripheral nervous system, the signals sent from the cortex region of the brain to other parts of our body, the tiny hair cells in the inner ear that process auditory signals, and the light-sensitive retina and cornea of the eye that process visual activity. We are on the threshold of an era in which these data processors of the human body may be manipulated or debilitated. Examples of unplanned attacks on the body's data-processing capability are well-documented. Strobe lights have been known to cause epileptic seizures. Not long ago in Japan, children watching television cartoons was subjected to pulsating lights that caused seizures in some and made others very sick.

**TYPES OF PSYCHOTRONIC WEAPONS**

**A psychotronic generator** produces a powerful electromagnetic emanation capable of being sent through telephone lines, TV, radio networks, supply pipes, and incandescent lamps.

**An autonomous generator** is a device that operates in the 10-150 Hertz band. At the 10-20 Hertz band, it forms an infrasonic oscillation that is destructive to all living creatures.

**A nervous system generator** is designed to paralyze the central nervous systems of insects which could have the same applicability to humans.□

**Ultrasound emanation devices** using ultrasound emanations are capable of carrying out bloodless internal operations without leaving a mark on the skin. They can also be used to kill people from a distance.

**Noiseless cassettes** is the ability to place infra - low frequency voice patterns over music, patterns that are detected by the subconscious. These messages are then stored in a person's sub-conscious mind which they may later act upon.

### MICHIGAN LAW AGAINST ELECTROMAGNETIC DEVICES

House Bill 4513 would amend the penal code (MCL 750.200h) to define "harmful electronic or electromagnetic device" as a device designed to emit or radiate an electronic or electromagnetic pulse or signal or microwave intended to cause harm to others or cause damage to, destroy, or disrupt any electronic or telecommunications system or device including a computer or computer network. The bill would also include a harmful electronic or electromagnetic device in the definition of "imitation harmful substance or device."

**The Nuremberg Code opposes all forms of human experiments**

**The state of Missouri has a law against involuntary chipping or implanting of a human. Many countries have laws against human experimentation and the use of electromagnetic devices to control a person either their mind or their bodies.**

### **SENATOR JOHN GLENN**

**Senator Glenn's publicly-expressed outrage that this government has been found to be engaging in brutal forms of involuntary human experimentation, and that any and all forms of this type of experimentation be exposed. He stated that there are experiments with non - ionizing, so-called &quot;non-lethal,&quot; directed-energy weapons, surveillance and psychotronic systems. He opposes Microwave Harassment and Mind-Control Experimentation especially connected to Los Alamos National Laboratory, the Department of Energy, the Department of Defense, CIA, and the National Reconnaissance Office. He stated the DOD has increased in the numbers of Ground Wave Emergency Network (GWEN) towers and satellites that qualify as directed- energy emitters, microwave towers, and antennae arrays. John Glenn is also a member of the Electronic Surveillance Project that is trying to stop these forms of harassment and human experimentation.**
